ABOUT US

We would like to introduce ourselves as leading manufacturers for a wide range of Office, Filing Systems, Modern Steel Slotted Angle Structures, Palletized Structure & Mezzanine Floor.

The Company was established in the year 1998 by Mr V.K. Dubey. we have developed excellent business relations in Banks, Educational Institutes, Hospitals and Commercial establishments, large and small scale Industries, Public and Private sectors & Shops And the list is ever growing each and every activity revolves around the customer - whether it is designing products, giving value for money or providing excellent sales/services, every time.

We understand that you also require the same storage systems introduced by us, for meeting the storage needs at your stores and offices. The unmatched quality and the durability of *Pushpa Storage Systems* will always be an asset to your company. We request you to kindly update our name in your database and forward all your valued enquiries to us whenever the need arises.

SLOTTED ANGLE RACKS

Pushpa's Slotted Angle Racks designed from the Vertical Angles & Horizontal Shelves along with the accessories made from the prime quality steel to tackle today's modern storage systems.

- Used for storage purpose in offices, factories, godowns etc.
- Shelves can be easily adjusted according to the means of storage.
- Available in all required sizes.
- Can bear the U.D.L. load capacity ranging from 30Kgs. to 500Kgs per loading level.

Open Type Rack

3 Side Closed Rack

Pigeon Hole Rack

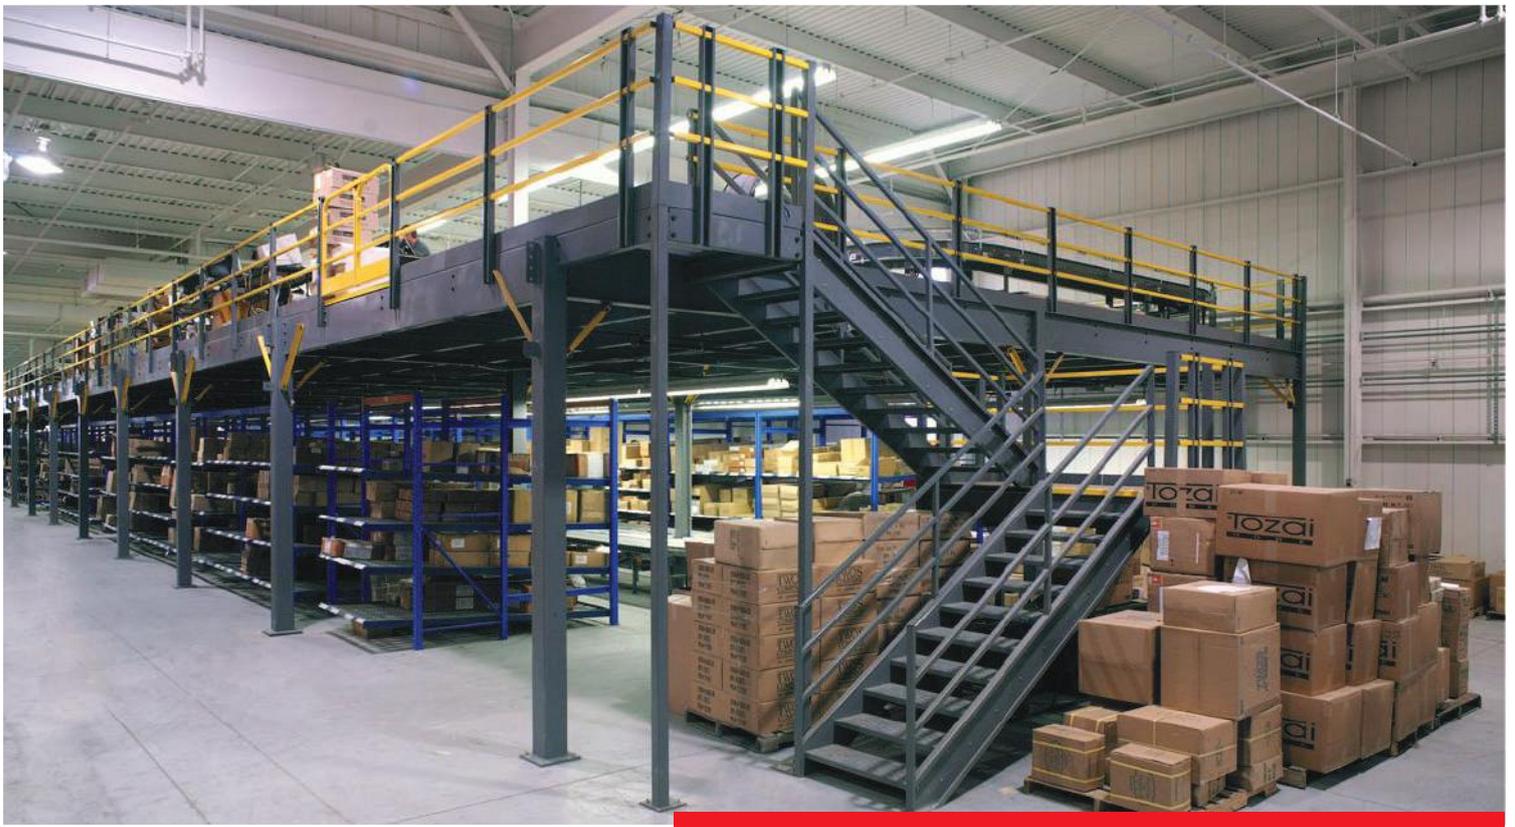

HEAVY DUTY PALLET RACKS

Pushpa's Heavy Duty Pallet stacking racks designed from the prime quality steel in various intricate forms for their usage in storage systems. These racks are designed by the verticals and the horizontal sections only, to with stand the pallets accommodating the loads from 500Kgs.- 3000Kgs. Per loading levels. The racks are designed in various sizes, depending upon the space requirement.

FEATURES:

- Comprises of two frameworks one vertical and other horizontal.
- Used for storing Raw materials and Finished goods at the stores and Godowns.
- Available in all required sizes.
- Can bear the U.D.L. load capacity of 0.5Tons - 3 Tons per loading levels.

MEZZANINE FLOOR / LOFT

We offer installation of mezzanine floor, which is the smart way to make use of twice or thrice the size of actual space. Versatile in nature, this can be altered anytime and without any material loss. The mezzanine floor is also cost effective, as it costs much less than the construction of a building & land.

Mezzanine floor is most widely used in all types of industries to optimize the storage capacity for warehouse or offices. Our system can be installed in virtually any space from floor to ceiling. Our team of mezzanine floorspecialists work in close co-ordination with clients at all stages of projects, providing detail design, construction, supply, installation and commissioning to meet their exact requirement.

2/3 TIER STORAGE RACKING SYSTEMS

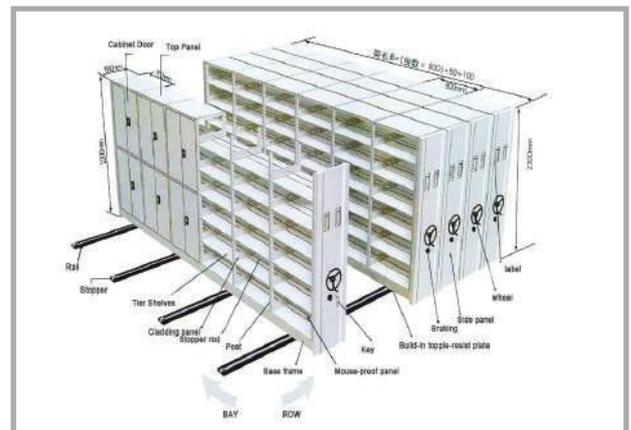

This system provides you the systematic way of storage of the valued products of yours. This storage systems is designed for the optimum use of space upto the ceiling. This system provides you with 200% higher space available. These racks are designed with Higher heights provided with the passages at the ground and the walkways at the height of 6' to 8' from the ground, along with the staircase for operation.

COMPACTOR RACK / MOBILE RACK

Pushpa's Compactor / Mobile racking Systems are unique and innovative method to increase the Floor Space storage area by eliminating all un-wanted aisles, which are otherwise required between every rows of conventional racking system. The entire unit moves on rails fixed onto the floor level and it's 100% indigenously built state of the art manual driven Sprocket Chain drive mechanism ensures smooth movement of these units in clockwise or anti-clockwise directions, thus creating the aisle space only for the particular unit to be currently used for storage & retrieval. The compactors forms to be an entirely closed units when brought together, ensuring dust free and extra hygienic storage conditions, which are mandatory for Pharmacy Industries, Electronic Assembly line etc., as per GMP / FDA / MCA / ISO standards.
